A2

Design Depot Global is a full scale design development and construction company driven by the desire to improve on the global built environment.

INTRODUCTION

Design Depot Global is a full scale design development and construction company driven by the desire to improve on the global built environment.

It is a full design consultancy and construction firm made up of architects, electrical engineers, mechanical engineers, structural engineers, interior designers, furniture makers and detailers.

It is a carefully selected group of specialists in fields that cut across the construction industry for the purpose of bringing value and depth to each project we carry out.

Our Core Services

- Design Development & Consultancy
- Construction
- Project Management

Experience & Competence

Mission Statement

The mission of Design Depot Global is to translate and deliver as clearly as possible, our clients' truest desires, into realities. We believe that ideas are tangible things. Therefore, we are never satisfied until grand ideas become brick and mortar.

Who We Are

We are a young and dynamic group of professionals with a drive to cater to the building needs of our clients through innovation, cost effective ideas and best practices. We are, therefore, a one-stop point for design, construction and project management.

Within the group of professionals at Design Depot Global , we have a combined wealth of experience of over 20 years in architecture, construction and project management.

Within the group of professionals at Design Depot Global , we have a combined wealth of

20 years

in architecture, construction and project management.

Retail Architecture and Fit-Outs

This is a key strength of the group. We have been involved in designing and building of major restaurants, eateries, shopping stores, banks and retail facilities in Nigeria. This vast knowledge and experience make us very well equipped to take on retail projects from design to construction seamlessly.

Commercial Architecture

We believe our knowledge of design and construction has helped us in this area. Putting together a team capable of managing a commercial project might seem daunting to others but we have been able to overcome that through proper project planning & management. Design and construction of schools, hotels, churches, shopping complexes etc; fall directly under our purview.

Residential Architecture

Our experience in designing and building of residential apartments is wide and very well documented. From fully detached apartments, semi detached apartments, terraces, maisonettes, blocks of apartments, to country homes and mansions; we are very well able.

ABOUT US

1

KUNMI AKOWONJO

Kunmi Akowonjo is a Chartered Architect with a strong passion for seeing design ideas turn into reality. That passion for design and build made him start Design Depot Global. He studied Architecture at the University of Lagos and got his First Degree. He further obtained a Masters' Degree in Environmental Design from the same University.

He joined Spaceframes Architects Ltd while still in school. Here, he grew and cut his teeth in the trade.

He worked on and single handedly took on projects for Guaranty Trust Bank, Standard Chartered Bank, First Bank of Nigeria Insurance, African Alliance Insurance, Domino's Pizza, Coldstone Creamery, KFC, Chicken Republic, Aquitane Oil & Gas and many private projects

2

ADEOLA OLATONA

Adeola Olatona is who you would call 'The Finisher'. He has a very developed eye for detail and a heightened sense of perfection.

He is the go-to guy for standards and how things work. Adeola's skills starts from design and he interprets them very well on site. He is very insightful and highly organized.

He studied Architecture at Obafemi Awolowo University and got his First Degree.

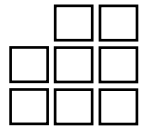

He joined Adeniyi Coker Consultants Limited, an Architecture Consultancy and Construction firm.

Of note; an 8 storey block of 32 Units of 3 Bedroom apartments, a 6 storey block of 16 units of 4 Bedroom maisonettes, a 4 storey 18 room private hospital are some of the numerous projects he worked on.

Adeola has over 8 years of experience and he brings this competence to the team. This is relevant on every project we take on.
